POWER OF GOD

Doctors gave up, but I was healed by faith!

Focus on Medicine

Better Understanding of the VeriChip

Message on WCDN Journal
by Dr. Jaerock Lee, Founder and
Board Chairman of WCDN

Rev. Dr. Jaerock Lee

Senior Pastor Manmin Central Church

Chairman,
The United Holiness Church of Jesus Christ

Founder & Board Chairman,
WCDN(World Christian Doctors Network)

Founder & Board Chairman,
GCN(Global Christian Network)

Founder & Board Chairman,
MIS(Manmin International Seminary)

Hallelujah! I give thanks to you who are working faithfully for God's kingdom with duty and vision as Christian doctors. Looking back upon the past footsteps of World Christian Doctors Network, we can see your enthusiasm for the Lord. Your passion and dedication have produced great fruit that a great number of Christian doctors have been awakened spiritually and participated in the ministry of WCDN.

Reading 1 Timothy 2:4, "[God] desires all men to be saved and to come to the knowledge of the truth," we see God's earnest heart for souls' salvation. He desires many souls, even one more soul to turn away from sins and garner an opportunity to reach salvation. In His earnest hope, WCDN was given the precious duty to spread the gospel. All of us who have received the duty should unceasingly proclaim and shout out solid evidences of the living God. That is why WCDN has come to publish this journal. It is for WCDN to spread the gospel actively and strive to save souls. I give all thanks and glory to God the Father who leads us in His guidance. Through this journal, I pray that proofs of the existence of the living God and His powerful works will be widely spread all over.

Dear Christian doctors and medical professionals, there was a time when the gospel was proclaimed with great influence which would affect the entire future course of Christian history. It was the time of the Lord's disciples who saw His ministry firsthand. Following Jesus, they saw and experienced countless signs and wonders performed by Him, so they could preach the gospel with full assurance in their voices. In addition, they didn't feel fearful in near-death situations and even took the way of the cross. Their ministerial footsteps were accompanied by mournful tears and blood of martyrdom for souls' salvation. The seeds of the gospel they sowed with tears and blood have been planted as true life in innumerable souls who had been on the way to death. It served as the foundation to spread the gospel all around the world and establish churches which are the Lord's body.

Unfortunately, many churches don't preach the true gospel from Christ as the end time is drawing near. As the world is buried under sin and darkness, even Christians have lost the light of the gospel. Moreover, many believers have been stained with secular humanism and materialism and even corrupted the essence of Christianity—salvation and sanctification through the blood of Jesus Christ. Now it's hard to find churches where God's powerful works unfold. But God is alive for sure and He let His children who seek Him with true hearts experience His works.

WCDN has received a number of divine healing testimonies from all over the world. Now it's time for you and me to shine in this dark world with the light of the gospel by showing the evidences of the living God. I hope this journal full of divine healing cases will become a precious messenger that delivers proofs of the living God to all the nations and God's earnest will for souls' salvation will be accomplished greatly through WCDN, which Father God has set and guided in His providence at this end time.

Dr. Gilbert Chae

MD, PhD, General Surgeon
President of WCDN

Hallelujah! I am extremely happy that Divine Healing Medical News has been printed. It is our journal made in an attempt to share the love of the Lord and give glory to God. I give all thanks and glory to God the Trinity who enabled us to publish the first issue of Divine Healing Medical News.

Dear WCDN members, we have already had nine international conferences held by WCDN, and we will soon have the forthcoming 10th conference. Most medical conferences are meetings where they attempt to share medical knowledge and technology. It is for this reason that there have certainly been some difficulties in conducting WCDN conferences where we deal with spirituality and medicine together. But still, we have come this far by the guidance of God, and also through the dedication and love of the founder of WCDN, and with your burning passion for the Lord Jesus Christ.

Divine Healing Medical News intends to deliver the healing works of God, which are beyond medical power, which I believe is one of your main interests. In this first issue we have a greeting from the founder of WCDN; news of international branches and directors; a greeting of Dr. Paul Ponraj, the director of WCDN India; an article about the movements of the anti-Christ; a column on Creation; a news article on the 2012 Kenya conference; information about the preparations for the 2013 Mexico conference; and the divine healing works of God.

WCDN members, you know well that the world is increasingly becoming darker day by day. Due to secular humanism, egocentrism and materialism there are many people who do not understand the truth, the gospel of Jesus Christ. Furthermore, the power of the anti-Christ is moving forward to capture the minds of people through various mass-media. However, just as light shines more brightly as darkness thickens, through divine healing cases presented by WCDN it will be made widely known among medical doctors and intellectuals that the Bible is true and Jesus Christ is our Savior. Such a movement, I believe, is a hand of God's salvation and mercy stretched out to the medical doctors and intellectuals.

What are the medical doctors supposed to do? As they deal with the marvelous human body, they should realize God's wondrous creation and kneel humbly before Him, but many rather believe and speak for Darwinian evolution and fill themselves with atheistic knowledge and pride.

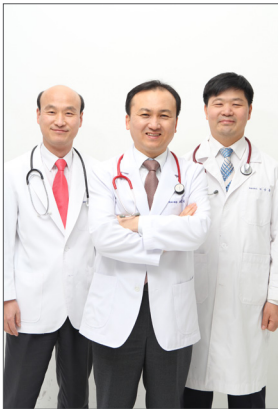

It is the heart-breaking reality of today's situation. But just as Jesus came down to this earth about 2,000 years ago and testified to the living God, the Holy Spirit's power is testifying to the gospel of Jesus Christ and the power of God the Creator today.

WCDN's journal Divine Healing Medical News will awaken all those who are spiritually sick through the love of the Lord and the power of the Holy Spirit. As a proof of the power and love of the Lord, we will present the words of life preached by WCDN's founder as well as the divine healing works of God, which nobody can deny have occurred.

In the name of the Lord I thank you, all the members, for joining this flow of spirit. I ask you to become the instruments of the Holy Spirit who lead so many souls to salvation. May your families and workplaces be filled with happiness, love of the Lord, and blessings of God! Again, thank you.

Merry Christmas

The 9th International Christian Medical Conference in Kenya

On the 25th and 26th of May, 2012, the 9th International Christian Medical Conference was held under the theme of 'Spirituality and Medicine' at Safari Park Hotel located in Nairobi, Kenya. More than 400 medical doctors and professionals gathered from 37 countries to attend the conference. In his video greeting Reverend Dr. Jaerock Lee, the founder and board chairman of WCDN, asked the medical doctors to deliver the love of the Lord through the divine healing works.

The organizing committee chairperson Dr. Zipporah Ngumi, who is the former dean of the University of Nairobi School of Medicine, pointed out the under-developed medical system in Africa, saying it is difficult for the patients to get any medicine, even if they manage to get a prescription. She then put an emphasis on the faith and roles of the Christian medical doctors saying they can pray for their patients and try to plant faith in them so their conditions can improve.

Dr. Joon Sung Kim presented cases of eyesight recovered by the prayer of Dr. Jaerock Lee. Dr. Edith Opala of Kenya presented a case of lower body paralysis healed by the prayer of African missionary bishop Dr. Myong Ho Cheong with the handkerchief on which Dr. Lee had prayed. Dr. Chang Kyu Yang presented a case of breast cancer healed by the prayer of Dr. Lee. Dr. Elio A. Coradin from Florida USA presented a divine healing case of stromal uterine sarcoma, and Dr. Armando Pineda-Velez, director of WCDN USA, followed by presenting a divine healing case of pseudomembranous colitis. Dr. Sang H. Yeo, general secretary of WCDN, presented the Thai case of cardio-pulmonary failure revived through the prayer of Dr. Lee broadcast on satellite TV. Dr. Brinda Venkatraman from India presented a case of severe spondyloarthropathy for 18 years, but was healed through prayer alone without any surgery. Dr. Zipporah Ngumi presented the case of an African woman who was gored by the horn of a buffalo but was healed by prayer.

As the cases were presented, the doctors and health professionals were amazed by the living God and His almighty power. Each presentation was followed by questions and answers. In some cases the actual persons subject to the healing in the presentation made appearances with the presenter and were welcomed with great applause.

Dr. Peter Okaalet of Kenya, Dr. Frans J. Cronje of South Africa, and Dr. David Nico of the United States gave special lectures on the ways to combine spirituality and medicine together in treatment.

Pastor Vasiliy Voytovich, who is running a TV channel in the United States, said in an interview, "I broadcast programs of the WCDN conferences every year, and I get very positive responses from the viewers. Many people will be saved if the medical doctors who gathered here pray for and deliver the gospel to their patients every day."

Doctors gave up, but I was healed by faith!

Praise and Worship Leader Rose Han

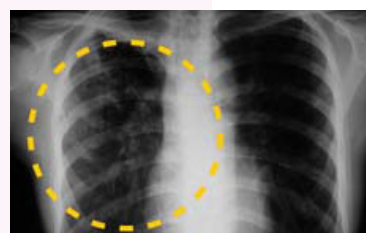

The doctor said, "Serious tuberculosis has developed in your lungs. It cannot be cured without receiving an operation." The most painful thing to her concerning his diagnosis was that she would not be able to sing again even if she should recover through the success of an operation. It was because her lungs had sustained too much injury. She first thought she had served only God without looking to the world. But when she met with that trial, she began to closely examine herself remembering the Word of God that teaches us disease comes from sin. She earnestly prayed to discover her sins from deep within herself and thoroughly repented of them, and thus her true became a trial blessing.

She completely depended on God and received the healing prayer from her senior pastor Dr. Jaerock Lee. Whenever she received his prayer, she felt she was getting better. Her weight had dropped to 30kg (about 67 Lbs), which was very skinny, but she began to gain weight. Her body started becoming filled with life and the coughing completely stopped.

She became assured of her healing from the heart, so she went to hospital for the reevaluation. The medical checkup said that she was completely healed of tuberculosis.

Before

After

The highest degree of disability is no problem before prayer to Him!

Deacon Yoonsup Kim

Mr. Yoonsup Kim was an electrical technician working at construction sites. One day he fell from the fifth floor of a building and hit the ground. He got a compression fractures of the 11th and 12th thoracic vertebrae and a hemiated disc between the 4th and 5th lumbar vertebrae.

Later he was diagnosed with the highest degree disability, a totally disabling condition. He had to permanently rely on a brace for his spine and be confined to a wheelchair.

After a few years he was guided to Manmin Central Church and attended the Special Revival Meetings. When he received prayers from Dr. Jaerock Lee, he experienced very powerful divine healing works from the Lord. Finally he came to walk normally and move his body freely. A couple of years later he got married and has a daughter now.

Before

After

The Reason the Sky Is Blue

By the word of the LORD the heavens were made,
and by the breath of His mouth all their host.
Psalm 33:6

When looking at the clear blue sky with no spot to be seen, we feel like our hearts are being brightened and purified. On the other hand, we feel depressed or have negative thoughts when we look at the sky that is overcast with low lying grey clouds. Our hearts are influenced by the color of the sky. That's why God didn't make the sky yellow, red, or purple. He made it blue.

The color 'blue' makes people feel composed and gives feelings of peace and hope. God offers his love so that we look up into the clear blue sky and think,
'I will lead a clear and pure life like the sky.'

The Exquisitely Designed **Human Eye**

Dr. Seung-shik Kim |
(WCDN) PhD.

Special Column

The inadequacy of Darwinian evolution becomes known through discoveries in biochemistry that mainly deal with the molecules, the smallest independent physical units of life.

According to their observations, Darwinians say that genetic mutations occur in every species. They claim that the species changes in appearance and character over time if the mutations are inherited. If so, then as eons pass, they presuppose significant changes in living organisms by the accumulation of such mutations. Therefore, Darwinian evolution is widely used to explain partial and physical variations of the species.

But since right after 1950, the molecular structures and the functional mechanisms of the living organisms at the molecular level started to be revealed thanks to the rapid development of the biochemistry. Highly specific molecular machines were identified that are precisely controlled to operate in accordance with cellular functions.

In 19th century, the anatomical structure of human eye became known. It has a similar basic structure to that of a camera. The pupil performs the same function of a shutter in a camera; the lens, the aperture that gathers light and focuses the light to the retina; and the retina, like the film of a camera. Of course, we are talking about the visual process of the eyes very simply. But it clearly shows us that only when each part in every step functions well and all the parts keep well-connected with each other, failing of eyesight or blindness doesn't occur.

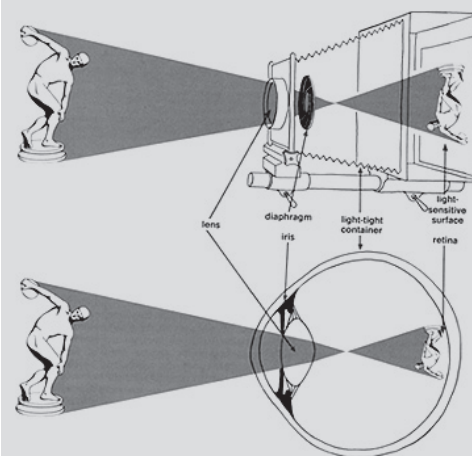

So then, contrary to Darwinian evolution, visual perception is not possible as it is unless a visual organ has an exquisite structure from the beginning.

It's surprising that Darwin didn't even try to unveil the evolutionary process of the eye in the first place.

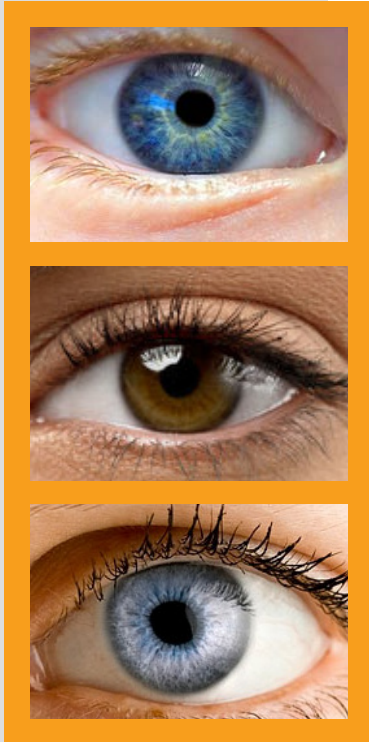

He just listed various kinds of animal eyes from simple ones to complex ones and suggested the idea that human eye had evolved as it passed through the listed steps. Therefore, the question concerning how visual perception started for the first time remains unresolved.

It is known to take three to four hundredths of a second for a man to recognize the change of a visual image. Of course, it is different from person to person but it is average. Recently, it was revealed that the human visual process includes very fast and delicate biochemical processes.

Let's just talk about the main steps briefly.

Special Column

The main biochemical processes of visual perception

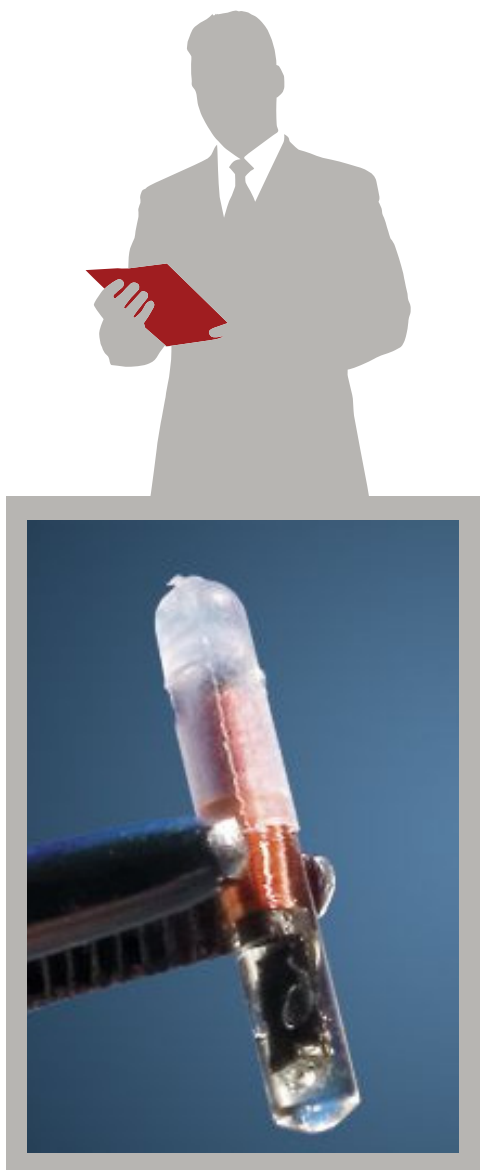

When light reaches retina- and interacts with the 11-cis-retinal in rhodopsin, the 11-cis-retinal converts to trans-retinal.

- It transforms rhodopsin that is a much bigger protein on the retinal into metarhodopsin II.
- When this metarhodopsin II binds with another protein transducin that is bound with GDP, GDP disassociates from transducin and GTP binds with it instead.
- GTP - transducin - metarhodopsin II complex is formed.
- It binds with phosphodiesterase in the cell membrane, which sever cGMP.
- As the number of cGMP molecules decreases by phosphodiesterases, the ion channels that control the number of the intracellular sodium ions by acting like gates of the ions flowing into cell become closed.
- The decrease of Na⁺ ions in the retinal cells changes the membrane potential, and initiates action potential. These signals are transmitted to the brain through the optic nerves. When they are decoded by the brain, visual perception is achieved. It takes only 0.03 to 0.04 seconds for all these processes to take place.

The biological steps and structures of visual organs that had been regarded relatively simple were revealed as very complicated biochemical steps in reality. In fact, Darwin's theory is based on gradual evolution step by step, but considering the concrete details of the steps, we can find that so many steps are jumped over without any explanation by the theory.

In the past, even scientists had not known the molecular aspects of life.

But now they look closely into the detailed molecular aspects of life with the brilliant development of the molecular biology. Therefore the modern supporters of Darwinian evolution must be able to provide a specific biochemical explanation about each step of evolution. But we have not yet heard about any satisfactory explanation of the evolution of the human eye. We can find only probable, all inclusive and coincidental explanations.

Better Understanding of the **VeriChip**

The VeriChip™ is one of the products that apply implantable RFID (Radio Frequency Identification) technology. The VeriChip is the name of the device owned by VeriTeQ Acquisition Corporation though it was invented by the VeriChip Corporation (known as the PositiveID Corporation).

In January, 2012, the VeriTeQ Acquisition Corporation acquired the VeriChip implantable microchip and related technologies. RFID technology has been already widely used in our lives such as transportation cards most Koreans use for public transportation like bus and subway. Beginning January 1, 2013, Korean government will enforce the Animal Protection Law that requires all dog owners throughout all cities and districts with population of more than a hundred thousand to have pets to be implanted with RFID devices. Thus, it can be expected that the implantable RFID device in animals will soon be widely distributed.

Personal information can be obtained through the unique 16 digit number. VeriChip is a coined word with the combination of two words: 'Verification' that means examination or confirmation and 'Chip' which is a small piece of silicon that is a part of semiconductor. Once scanned by RFID reader, the VeriChip implanted in human body responds with a unique number. It is then linked with the information about the user held in a database for identity verification, medical records access, and other uses. The VeriMed™ system seeing limited use the U.S. uses RFID human-implantable microchip that links to a web-based Personal Health Record. With the system, doctors

can gain patients' ID, medical history, and medical records.

Considering the Korean situation, each person's unique number can be his/her resident registration number, and the RFID chip with the number may be implanted in the people. In October 2004, VeriChip™ received the U.S. FDA (Food Drug Administration) approval for medical use. Until now, it was the only FDA-approved human-implantable microchip among RFID products. The VeriChip's transponders are cylindrical, measuring 11.5mm in length and 2.1mm in diameter.

There are a computer microchip (which is capable of storing more than 70 trillion unique numbers) that contains the unique 16 digit ID number assigned to the transponder and a radio antenna inside. The outside of the transponder is a soda lime glass that has been specially selected for good contacts with human cells, which could hardly allow the transponder to move around in the body once injected.

It is recommended to inject the chip in the forearm using a special syringe after local anesthesia.

The RFID products implantable within animals have been produced by Avid ID in the U.S., Virbac in France, and Trovan in the U.K. as well as the VeriChip in the U.S.

They have been available in the market. Additionally, the VeriChip Corporation has developed an implantable chip in animals that can track their locations via GPS (Global Positioning System). It obtained a patent on the chip by the U.S. Patent Office in 1999. This chip is available in the market for uses of tracking wild animals and managing livestock.

The U.S. healthcare reform bill includes the provision about an implantable device and the enforcement of the law in 2013.

The reason why the VeriChip is becoming a social issue is because the U.S. healthcare reform bill requires the implantable chip to be used in people. This reform bill is aimed at supporting more than 32 million uninsured Americans by requiring health care coverage for all U.S. citizens and legal residents. But the bill specifically includes “a class II device that is implantable,” which stipulates the implantable RFID device in human bodies. On Sunday March 21, 2010 the House of Representatives passed the healthcare bill and it was signed into law the following Tuesday by the U.S. President Barack Obama.

It also says the law should go into effect “Not later than 36 months after the date of the enactment” which means not later than March 23 in 2013.

On December 13, 2010, a federal judge in Virginia declared the healthcare law unconstitutional, claiming that the federal law’s requirement that citizens buy health insurance is unconstitutional.

But the Supreme Court ruled that individual health insurance mandate is constitutional on a decision of 5 judges vs. 4 judges to uphold the law on June 28, 2012, which decided the law’s enforcement. This chip can be used for a system that monitors and controls all people of all countries. The VeriChip has been already used in many countries. Mexico is using the VeriChip in their law enforcement organizations including the Mexican Attorney General in order to differentiate them from the drug cartels in accessing secure locations and documents. Some night clubs in Netherlands, Scotland, and Miami in the U.S. are promoting the implantation of the VeriChip to its customers for VIP’s easy access and payment. In those ways, it has been used for ID verification and e-commerce. It hasn’t been tested in a clinical trial in human, but its technology has been greatly developed such that it can provide tracking service.

Revelation 13:16-17 says, “And he causes all, the small and the great, and the rich and the poor, and the free men and the slaves, to be given a mark on their right hand or on their forehead, and he provides that no one will be able to buy or to sell, except the one who has the mark, either the name of the beast or the number of his name.”

This tells us that the Antichrist will force all people of the whole world to receive the mark of the beast and monitor and control their economical and social activities all day and every day at the second half of the Seven-year Great Tribulation.

Of course, we’ve not yet come to know if the mark of the beast refers to the widely-used bar-code, the VeriChip system, or any other more highly developed form of technology.

But we have to realize that this kind of system can be used to monitor and control the people of the whole world through the connection to a database of a super computer. If you understand it, you will realize how near the last hour is drawing. By doing so, we need to be quick to complete adorning ourselves as brides of the Lord.

WCDN Latin American Conference

To introduce divine healings to the medical doctors in the region as well as in preparation for the 2013 international conference in Mexico, Dr. Daniel Fuentes, the organizing committee chairman, held the WCDN Latin American conference in Toluca, Mexico on the 14th and 15th of September 2012.

Dr. Daniel Fuentes introduced the ministry of AMEC (Alianza MEDica Cristiana, www.amecestadodemexico.org) - WCDN and a touching divine healing case of quadriplegia to the attendants.

There were presented other wonderful case reports of divine healing of mesenteric thrombosis and physical death by Dr. Armando Pineda, and massive heart attack by Dr. Elio Coradin. Then there was a healing testimony of cancers of breast, liver and colon.

Lectures were presented on the topics of healing of the soul and body; the spirit of disease; miraculous healing of emotions and the mind; the omnipotence of God in divine healing; God in the medical consultation and practice; the touch of healing faith; and elements between faith and science in divine healing.

A special organization was also introduced for children with cancer. The finale was a very amusing concert by mariachi and traditional dance.

WCDN headquarters sent a delegation of three people including Dr. Alvin Hwang, the vice president. They presented the video 'The Power of God' with Dr. Jaerock Lee, the founder.

This event brought together the organizers for the 10th international Christian medical conference in Mexico in 2013 and the staff of AMEC to cooperate well to give great glory to God through the conference.

WCDN Bulgarian Conference

Prof. Lyubka Tancheva, the director of WCDN Bulgaria, came to share the vision of WCDN after having attended the 8th international Christian medical conference in Brisbane, Australia. In an attempt to start the ministry of WCDN in her country, she held a Christian medical conference in Sophia, the capital city of Bulgaria, collaborating with Christian Center Sofia (pastor Ivan Hazarbassanov) and 'Good Future and Hope' association.

Prof. Lyubka, Dr. Kiril Svilenov, chairman of the Bulgarian Christian medical association, and his father Prof. Dechko Svilenov gave lectures on important subjects. Several significant Christian ministries with medical expertise were presented at the conference, such as Advocates pro Life Foundation, Light for Life Foundation, Control and Prevention of Cancer Association, New Man Foundation, The Betel - Bulgaria Foundation, and Europe 11 Association. And several of the numerous miraculous cases of healing were presented including quadriplegia and leukemia. A famous journalist Lachezara Yosifova led a fervent prayer.

In the evening the conference ended with a big healing service led by evangelist Ilija Milanov and pastor Daniel Rozen represented from WCDN Israel & Middle East. Many people accepted Jesus Christ as their Lord and Savior and many received their miraculous healing.

A delegation of three people from WCDN headquarters, including Dr. Alvin Hwang, the vice president, congratulated on the good start. With the very favorable responses received from the attendees at this conference, the staff agreed to expand this ministry to all of the Balkan countries beginning this coming year.

Letter from WCDN INDIA

Dr. Paul Ponraj
Director, WCDN INDIA

WCDN India Held a Seminar at Dr. Somervell Memorial CSI Medical College & Hospital in Karakonam, Kerala State

It is a privilege for me to give this message.

I had the great opportunity to meet Rev. Dr. Jaerock Lee in the year 2004. He had a burden for the medical fraternity. He founded the World Christian Doctors Network which focused on divine healing.

The first conference of WCDN was held in Seoul, South Korea. WCDN INDIA was formed in December 2004 with representative doctors from WCDN Headquarters at Seoul, South Korea and some eminent Indian doctors of Chennai. WCDN INDIA was established in January 2005.

The 2nd International Christian Medical Conference of the WCDN was held at Chennai, the capital city of Tamilnadu State, India in May of 2005 which was well attended by more than 500 doctors from 11 countries.

This conference featured many presentations of the divine healing cases with scientific evidence.

WCDN India held Christian medical seminars in Nagercoil, Tiruchirapalli and Madurai city of Tamil Nadu State, Hyderabad City of Andhra Pradesh State, in the Trivandrum City and SM CSI Medical College in Karakonam of Kerala State.

In addition, WCDN INDIA has conducted preliminary meetings in New Delhi, the capital City of India and a Free Health Camp at Chennai Manmin Holiness Church in Chennai, India.

I wish WCDN International God's blessing and the fulfillment of the purpose for which Rev. Dr. Jaerock Lee founded this organization.
