Unchanging Heart

“...let us draw near with a sincere heart in full assurance of faith, having our hearts sprinkled clean from an evil conscience and our bodies washed with pure water.”
Hebrews 10: 22

Rev. Dr. Jaerock Lee

Senior Pastor, Manmin Central Church

Chairman,
The United Holiness Church of Jesus Christ

Founder & Board Chairman,
WCDN(World Christian Doctors Network)

Founder & Board Chairman,
GCN(Global Christian Network)

Founder & Board Chairman,
MIS(Manmin International Seminary)

To have an unchanging heart is to be unwavering and consistent. It is naturally required of God's children to have unwavering heart, for 1 Samuel 15:29 says, “Also the Glory of Israel will not lie or change His mind; for He is not a man that He should change His mind.”

Some people are, on the contrary, faltering. When they like somebody, they act like they would give him everything they have, but if they do not like something of that person, they would just forsake him or even become enemies. The biggest reason why people do not keep their minds but change them is because they have cunningness, with which they change their mind following their own benefits. Then, what do we have to do to be unfaltering? We just have to rid ourselves of cunningness. We can just make our heart a truthful heart that has no falsehood. We call this truthful heart free of falsehood ‘sincere heart’.

The ‘sincere heart’ in Hebrews 10:22 is the heart that is full of goodness but free of evil and unrighteousness. It is also a heart that is full of truth and a holy heart that resembles the heart of the Lord. We can have perfect faith to the extent that we cultivate sincere heart.

In the Bible, we find some people who pleased God with their unchanging heart. First, it is Ruth. She was a Gentile woman who married a Hebrew man who moved to Moab, but her husband died early. Her mother-in-law Naomi also lost her husband as well as her two sons. She decided to go back to her homeland, Israel, and suggested her daughters-in-law to go back to their own families. One of them, Orpah, went back weeping, but Ruth didn't. Just think about what kind of decision you would have made if you were in Ruth's shoes.

You wouldn't have any hope in the future if you followed your old mother-in-law. You don't have any wealth or husband, and you'd have to worry about making ends meet everyday as a widow. Especially, you'd be very lonely for there'd be no family member or friend who would understand and speak to you with words of comfort. Furthermore, you don't even have any children to rely on when you get old. Nevertheless, when her mother-in-law Naomi told her to leave, Ruth said she would be with her until the end. Today, people do not want to

serve their old parents. But Ruth was sacrificing her future to serve her mother-in-law, leaving her own country and people. Ruth had the sincere heart to never change what she once decided to do. God greatly blessed this Ruth for her sincere heart. He gave her a happy and abundant life on this earth, and made her the great grand-mother of King David. It was a tremendous spiritual blessing to be on the genealogy of the Christ.

Let us look back as to whether we've been serving everybody with this kind of unchanging heart. In serving God, perhaps you gave thanks when things were good, but you couldn't be thankful when things were not good. Maybe, you used to stay with some people because it was beneficial to do so, but when staying with them was not beneficial for you any longer, you began to stay away from them. We have to understand through Ruth's example that God is pleased with doing what we are supposed to do with a steadfast heart. If you without changing mind love and serve your parents, teachers, brothers and sisters in faith, and especially God the Father and your shepherd who leads you into spirit, you will be greatly blessed.

There is also a person who had unshakable heart in terms of his love. If we really love the Lord, we will naturally have sincere heart that cannot be shaken. But many people say they love the Lord, but their hearts are not sincere. It's because they do not love the Lord truly.

They come to church for they can be saved only when they believe in the Lord, but when they have to sacrifice themselves for the kingdom of the Lord, they are hesitant. The Lord gave them such great grace and love by sacrificing Himself for those who were destined to die due to their own sins. But those people are too stingy to pay back the grace of the Lord.

But the apostle Paul never forgot the grace and love he once received from the Lord; his love for the Lord never changed

in any situation. He loved the Lord with all his life.

At first, Paul did not understand Jesus is the Son of God, so he was capturing those who believed in Jesus Christ. He believed it was the right thing to do as a child of God. But once he met Jesus Christ, his life was completely renewed. Whenever he thought of the providence of salvation through Jesus Christ, the first emotions and grace he received were always refreshed. The walk of faith that Paul took was not an easy way by any means. But his love for the Lord was never faltered by any persecution, hardship, test, or threat.

If we with an unwavering heart continue to show our deeds of love for the Lord even when we are going through hardships, the Lord will surely give us comfort and answer to problems. As we experience these situations, our love for the Lord will only become greater each time.

This is the reason why Paul came to love the Lord increasingly more as he went through difficulties again and again. His heart was never shaken in any hardship, and thus the Lord was with him comforting him and giving him the strength to overcome all his trials. In this way, Paul cultivated perfect love which has no fear, and he worked faithfully to fulfill His will until his life ended on this earth. He proved his great love through martyrdom. As a result, Paul reached a very honorable position in Heaven. God the Father received all his love, devotion, and faithfulness and overflowing blessed him.

If our faith in God and love for Him do not change in any test or trials, and if we have sincere heart to unchangingly serve God and people around us, God will not just leave us alone but give us comfort and blessings. Therefore, I pray in the name of the Lord that you will be guided to prosperous ways and receive abundant blessings of God by having unchanging, sincere heart.

The Law of Hope

Now faith is the assurance of things hoped for,
the conviction of things not seen.
Hebrews 11:1

Flamingos in Jurong Bird Park, Singapore,
have the most beautiful light pink feathers in the world. They say
that this is because the birds see light pink water
and eat fish from the water.

Through this, we can realize our appearance can be
different according to what we see and take in.

This is also supported by scientific data.

Our hearts are much the same.

What we see makes a difference.

What we take in through our senses affects us.

Our hearts can be changed into beautiful hearts or evil
and filthy hearts depending on what we see and take in.

The 10th International Christian Medical Conference **in Mexico 2013**

*Over 350 medical doctors from 24 countries
became witnesses of God's power!*

World Christian Doctors Network (WCDN) is an organization of Christian doctors transcending denominations, headquartered in Seoul, Korea. The members promote fellowship and testify to the living God through divine healing case presentations and key lectures on duties of Christian doctors.

From June 14th to 15th in 2013, the 10th International Christian Medical Conference was held by WCDN (World Christian Doctors Network) in Toluca, Mexico.

With approximately 350 medical doctors and professionals from 24 countries in attendance, the conference kicked off under the main theme

of "Spirituality and Medicine". In his welcome message, Dr. Gilbert Chae, President of WCDN, appealed for solidarity of Christian doctors in faith and urged them to awaken medical professionals and intellectuals through the conference. Dr. Jaerock Lee, Founder and Board Chairman of WCDN, said on his video message, "The ministry of WCDN is absolutely necessary at this end time to lead countless souls to the way of salvation. So, I ask you to dedicate yourselves to this goal with all your hearts, minds and strength."

Dr. Daniel Fuentes, Chairman of Mexico Organizing Committee, stated, expressing his

gratefulness to WCDN Headquarters, "It is a great honor for us to be the first country in Latin America to hold WCDN International Christian Medical Conference".

With concrete medical data, this conference featured seven presentations of divine healing cases.

Dr. Chae presented cases of two patients whose medical situations were critical due to cerebral hemorrhage and both were healed through Dr. Jaerock Lee's prayer with faith. Dr. Manuel Pastrana, Mexican plastic surgeon, delivered his daughter's case. She slipped into a coma with takotsubo cardiomyopathy after receiving plastic

surgery from him. But after Dr. Jaerock Lee prayed for her from Korea transcending space and time, she recovered. Dr. David Eu, a family physician from Singapore, presented his son's case. His son had sepsis caused by a urinary tract infection complicated with paralytic ileus and jaundice, but he was restored to health by Dr. Lee's prayer. Dr. Elio Coradin, an interventional cardiologist from Miami, presented the case of recovery of a newborn baby from cardio-hepato-renal syndrome due to fervent prayers of family and churches. Dr. Francisco Barbosa, a general surgeon from Brazil, presented the case of cavernous hemangioma miraculously healed by

CONFERENCES

prayer.

Among the presentations, the individuals in the cases, that is, the people who experienced divine healing, appeared personally—which drew great attention from the attendees! Dr. Daniel Fuentes(OB/GYN) presented the case of primary infertility healed only by prayer of faith. The pregnant woman gave a touching testimony after his presentation. Dr. Andre Gasiorowski(OB/GYN, ENT specialist), Chairman of Helping Hand Coalition of Israel, introduced the case of a female violinist who had come down with Hodgkin's lymphoma but recovered very fast due to prayers. After the presentation, she gave her personal testimony and glorified God with her

performance.

In addition, special lectures were given that aroused spirituality in the attendees as medical professionals. Dr. Luis Paz, a family physician from Puerto Rico, and Dr. Apolos Landa from Peru lectured on the Christian doctors' vocation and the aspects of respect emphasizing that doctors should be able to provide patients with recovery both spiritually and physically. Dr. Alvin Hwang, Vice President of WCDN, gave a lecture on "The Principles that We Need to Know to Receive Divine Healing" based on Dr. Jaerock Lee's biblical teachings, the cases presented at the international conferences of WCDN and his daughter's healing process. It gave helpful answers

to the questions that many people have wrestled with. The lecture of Dr Chauncey Crandall, a renowned interventional cardiologist from Palm Beach, Florida, was focused on his testimony that after his prayer for a patient who had died and was being prepared for the morgue, he was brought back to life without any complication. His prayer led many attendees to salvation and healing like the first day evening prayer meeting led by Pastor David Jang from Colombia Manmin Church.

In particular, the performance of Sound of Light Chorus from Manmin Central Church gave the attendees a strong feeling and sense of unity among one another and their wonderful

praise and dance gave great grace and emotional fulfillment.

After the conference, Dr. Daniel Fuentes said, "Jesus Christ performs miracles the same yesterday and today and shows His love towards the world. This conference greatly glorified God through medical proofs of divine healing, special lectures that restored spirits, and the Spirit-filled performances, which were astounding!"

In the meantime, closing prayers were offered up by Costa Rican Ambassador Fernando Borbon to Guatemala (first day) and Messianic Jew Pastor Daniel Rozen from Israel (second day). The 11th Conference is to be held in Sofia, Bulgaria in 2014.

We were one in Mexico in the name of Jesus Christ

Dr. Daniel Fuentes Acosta (Mexico)

- Director. WCDN Mexico
- Chairman of Organizing Committee
WCDN Conference Mexico

Since the first time we saw WCDN Ministry. We felt a fire that moved our hearts to ask God for that blessing not only for our country but also for our entire Continent. The previous months before the Conference we saw the great expectation it caused among many people including medical health personnel and even pastors from all over the continent. For first time in Mexico and Latinoamerica we as medical experts could discuss science and spirituality based on medical evidence which proclaims the power of a living God.

This Conference gave to our country a sense of unity among the body of Christ. This beautiful time was full of the grace and the power of the Holy Spirit. It was a great opportunity to testify the healing power of God, his mercy, his love and the redemption of our beloved Lord and Saviour Jesus Christ being as medical doctors witnesses of it, and having the challenge to be health professionals of hope, instruments of the Lord who lead many souls to salvation.

While each case was presented, the doctors and attendees were amazed by the wondrous power of the Lord.

We had a very favorable response from all the attendees regarding the special lectures. And many people accepted Jesus Christ as their Lord and Saviour.

The performances of Sound Of Light as well as from Pastor Dimitri Petrovski and his wife Katia Pretovski brought the attendees a special touch of God to praise and worship the Lord in a beautiful way all together as the Bible says 'all nations' and tribes and people and tongues .

Many doctors from different countries came back to their homes with a fire in their hearts.

The Lord has opened the heaven in many countries after the 10th WCDN Conference, and during the next months we will be working hard with doctors from Latin America proclaiming the gospel through healing ministry, and encourage them to work all together with WCDN.

Sepsis due to Urinary Tract Infection complicated with paralytic ileus and Jaundice

Dr. David Eu (Singapore)

- Director, WCDN Singapore
- General Practitioner

God's Healing of a seven week old infant from Sepsis due to urinary tract infection, complicated with paralytic ileus, and jaundice.

Our God is a Great God. We have seen and heard so many healings in Manmin church, it is now our turn to experience God's healing personally.

David junior was delivered at full term, via normal vaginal delivery on 14/10/2009. When he was only seven weeks old, he developed a low grade fever, as he was asymptomatic and there was no obvious cause, so we decided to observe and wait. By day 10, his fever was still persistent, we brought him to his paediatrician, Dr Simon Ng at Mount Alvernia Hospital, on 30/11/2009. Physical examination did not reveal any abnormality, so a blood test and urine test was ordered. Result

was as follows, FBC, TW high normal, Urine FEME WBC 900 (0-6) CRP >250 (1-10), Urine culture E Coli, > 100,000 org/ml. With these results, the paediatrician diagnosed our son as having Urinary Tract Infection and immediately advised David junior to be admitted into the hospital for intra venous anti biotics. However we did not want our son to be admitted as we felt that since he is so young, there may be side effects of the anti biotics, and as Christians, we believe our God can heal him through prayers.

Over the next two days, David junior condition worsened, his temperature did not come down, it was 39-40deg C, he became paler and jaundiced, his weight dropped from 5.1kg to 4.5kg, he became drowsy, less alert, he has poor appetite associated with vomiting. His abdomen became distended and discomforted. When we lifted up his

legs to change his nappies, he would cry in pain. Possible signs of paralytic ileus due to sepsis, or peritonitis. his urine and bowel motion was normal.

We were struggling if we had done the right thing by withholding treatment for David junior, yet we believe in our God that He can heal, but we have little faith. We contacted our senior pastor in Manmin Church through email and asked him to pray for our son. Senior pastor Jaerock Lee prayed for our son on Thursday, Friday night prayer meeting and on Sunday evening service.

The power of God transcends over time and space, through senior pastor's prayer in Korea, we receive his prayer in Singapore. After his prayers, his fever began to drop, from initially 39-40deg C, it has dropped to 37-38deg C, and finally on Sunday, his fever is totally gone. His abdomen distension soften, and he smiled for the first time.

Over the second week, his fever is now gone, his abdomen has subsided, he is still jaundiced, and urticaria and erythema

patches appeared all over his body. There was a small perianal pustular lump that formed and later subsided. I was not too worried about his jaundice because he had jaundice during his first month and blood test (indirect bilirubin) indicated that it was due to breast feed jaundice.

I emailed senior pastor and updated him on David junior improvement.

However on Friday 11/12/2009, CRP 17.4 Urine FEME WBC 900, liver function test, his total bilirubin was raised 251umol/l, and direct bilirubin 235umol/l. It was due to hepatic or post hepatic cause and not physiological jaundice. Before I could update senior pastor of this high bilirubin level due to hepatic/ post hepatic cause, senior pastor read out my previous email during Friday night prayer meeting and gave glory to God for His total healing.

Although David junior is still jaundiced, we believed and received his healing in faith, two days later, his jaundice cleared.

On 18/12/2009 blood and urine test showed Urine FEME WBC 50, Total

Bilirubin 49umol/l Indirect bilirubin 38umol/l. These results confirmed his urinary tract infection and hepatic sepsis has resolved.

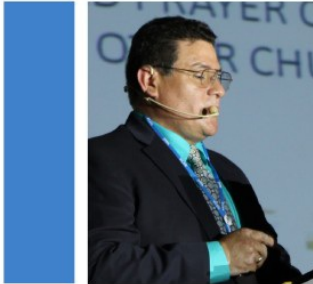

Throughout David junior's illness, no medication was given, no antibiotics nor paracetamol was given, he is on total breast feeding.

We give all thanks and glory to our God.

Takotsubo Cardiomyopathy

This is the testimony of my daughter and the power of the prayer

Dr. Manuel Pastrana Figueroa (Mexico)

- Plastic surgeon

HER CURRENT CONDITION AFTER THE SURGERY

Denied previous illness starts December 16, 2011 two days after a postoperative cosmetic surgery in the intra-operative was managed with general anesthesia without complications.

The surgery time was 5 hours without significant bleeding data. Postoperative data normal, but in the immediate postoperative period begins with heart failure data to rule out pulmonary embolism thrombus.

CLINICAL DIAGNOSIS

Hypotension
Diaphoresis
Tachycardia
Respiratory failure
Pallor
Hypothermia
Unconsciousness
All this to withdraw the bandages two days after surgery

SHE WAS TRANSFERRED TO INTENSIVE CARE

Not answer to resuscitation, she is transfer to the ICU her current state was hypovolemic shock suspected by probable visceral perforation, suspected

pulmonary embolism, rule out myocardial infarction. We performed her series of laboratory and imaging studies.

ICU CARE

On arrival at ICU, although aware invasive procedures are performed. Her signs are deteriorating fast and she is intubated and handled fan. Maneuvers are performed fluid resuscitation, amines and blood (3 globular packages) Because we found her with anemia of 5.6 g of hemoglobin. Declared as severe-with high risk of death

LABORATORY STUDIES

Anemia of 6.5 g Hb.
Other studies within normal parameters. Abdominal ultrasound without evidence of bleeding of organ drilling data. Plate RX normal chest and abdomen. Electrocardiogram data without infarction. Cardiac ultrasound valued ventricular election below normal. Mean arterial pressure below 50

CARDIOMYOPATHY TAKOTSUBO

THE TYPICAL PRESENTATION OF A PERSON WITH TAKOTSUBO CARDIOMYOPATHY IS A SUDDEN ONSET OF CONGESTIVE HEART FAILURE OR CHEST PAIN ASSOCIATED WITH ELECTROCARDIOGRAPHIC ABNORMALITIES SUGGESTIVE OF ACUTE MYOCARDIAL INFARCTION OF THE ANTERIOR WALL.

Erika is a woman 19 years old, student, married, and has a son of 1 year.
We praise our Lord Jesus Christ and give thanks to all our Manmin brothers and sisters.

POSSIBLE DIAGNOSIS

Discard acute bleeding or perforation of visceral organs.

Pulmonary thromboembolism is discarded.

Anemia not justify her serious condition.

Establishing the probable syndrome of TAKOTSUBO

Because of the ventricular wall weakness found in cardiac ultrasound and ejection fraction also decreased mean arterial pressure below 50 mmHg

TAKOTSUBO CARDIOMYOPATHY

Synonyms

Stress-induced cardiomyopathy

Transient apical.

Broken heart syndrome.

A type of non-ischemic cardiomyopathy in which there is a sudden weakening of the myocardium

TAKOTSUBO

The cause appears to involve high levels of circulating Catecholamines (mainly adrenalin / epinephrine).

The evaluation of individuals with takotsubo cardiomyopathy typically includes coronary angiography, which may not reveal some

significant obstructions that may cause left ventricular dysfunction.

When the person survives his initial presentation, left ventricular function improves within 2 months.

Takotsubo cardiomyopathy is more common in post-menopausal women.

Usually has a recent history with a severe physical or emotional stress.

THE MIRACLE

Erika was five days in intensive care fighting for her life since the forecast she had little chance of life.

Prayer chain is asked to Manmin Church in Korea, through Dr. Armando Pineda and Kimberly who asked the Pastor Jaerock Lee to pray for her.

The pastor and intercessors prayed fervently that day, Erika got out of her serious condition immediately and on December 22 the miracle happened.

TALITA KUMI, TALITA KUMI amen

We praise God for the miracle

While in ICU, and being in danger, her mom clung to the song

If you want. Lord

If you want, if you want, you can heal her and our Lord Jesus Christ did it.

GOD MAKES MIRACLES Doctors are just instruments.

Primary sterility because of chronic anovulation and polycystic ovarian syndrome

Dr. Daniel Fuentes Acosta (Mexico)

- Director. WCDN Mexico
- Chairman of Organizing Committee
WCDN Conference Mexico
- Obstetrician / Gynecologist

This is my patient and one of the most beautiful miracles that I have seen, because we could see the creative power of our Lord giving life and blessing this woman who believes in God's power and his word.

- A 36 year old-female with a history of 6 years of primary sterility without medical tx with first partner from 2000 to 2006 -Sterility as a cause of divorce.
- She married again and had three years of sterility from 2010 to 2012, likewise with secondary amenorrhea for a full year,so start with protocol studies for primary sterility

In 2011 begins her study with an ecography which reports both polycystic ovaries, hormonal profile which demonstrates reversal of FSH and LH and progesterone indicated by anovulation

- One of the infertility problems that affect more women is the polycystic ovary syndrome. This syndrome is caused by a hormonal imbalance in women. There are female hormones, estrogen and progesterone but also have

androgen(male hormone typical) lesser amount with this syndrome occur more androgens and menstrual cycle is not regulated properly. In the ovary, the follicles do not release eggs because they do not mature and produce cysts.

- The ovarian endocrine factor is a cause of infertility in women. Any alteration in the various stages of normal ovarian cycle may lead to an anovulatory cycle associated with a wide range of menstrual alterations. Chronic anovulation is a cause of infertility.
- Anovulation, one of the causes of female infertility. During a woman's menstrual cycle is release of a mature egg that can be fertilized by sperm. When the ovary is incapable of expelling said egg is a disorder known as anovulation. Anovulation is one of the causes of female infertility as it assumes the absence of viable oocytes

Therefore, it was decided to use ovulation inducers

- 1st treatment with artificial insemination and ovulation inducers February 2012.-failed
- Treatment 2nd March 2012,
- USE GONAL F 75UI, 10 boxes,

- CHORAGON 5000UI 2 boxes
- UTROGESTAN 200MCG 2 boxes

In April 28th, 2011 The ecography diagnosed a pregnancy anembrionic, so it was indicated the need to make a curettage, but this woman talks to God and she asked him why it was happening.

- READ THE BIBLE IN DEUTERONOMY 28, AFTER READING
- SHE FELT PEACE AND COMFORT
- IN THE NEXT DAY THE DOCTORS MAKE A CURETTAGE WITHOUT COMPLICATIONS

She left the hospital given her a new appointment in 20/05/2012, with reproductive biology office for another trial with artificial insemination with ovarian stimulation 6 months after curettage. She was suggest in vitro insemination for breeding biology, which she decides to go no treatment and does not accept it, remember the promise she had read in Deuteronomy 28 which says

- The fruit of your womb will be blessed,

The Lord will send a blessing on your barns and on everything you put your hand to. The Lord your God will bless you in the land he is giving you

- In the month of January, 2013 in a women's prayer vigil, her mother prayed for her and she thought she would have a new pregnancy, feeling immediately intense heat in the pelvic region and immediately thanked God for her new pregnancy IN FAITH.

• 16/01/2013 performing a pregnancy test which is positive,(7 weeks pregnancy) but in the ultrasound found again anembrionic pregnancy. The doctor says she needs to re-curettage because it had previous diagnosis of pregnancy (anembrionic); she rejects the doctor's words and again started prayers, believing in God's promises.

Nowadays she has a 20-week normotensive pregnancy, prenatal care leading by Dr Jose Anaya Herrera, being witness to her own doctor and many others about God's power to create and to give life. We praise the Lord for his amazing love.

The Principles that we need to know to get Divine Healing

Dr. Alvin Joonha Hwang (Korea)

- Vice president of WCDN
- MD, PhD (Neurophysiology)

I read an article in the famous American Christian magazine "Charisma" last February. The title was "When Christians Die of Cancer". The article was about the death of a campus minister Benny Benson. He had a malignant tumor in his spine. Nothing could stop the spread of the disease — not radiation, chemotherapy or surgery. More than 500 people attended his funeral. These had prayed for Benny to be miraculously healed of the cancer.

"Whenever loved ones are taken from us, we ask hard questions. Why does not God always heal when we pray? Why would He let a guy, only 58, get sick with cancer when he was seeing amazing results in his campus ministry. We have been taught that God "always" heals especially if we pray according to the latest 1-2-3 formula, if we break every generational curse, and if we bind every demonic power that might be lurking behind the surface.

Miraculous healings do happen sometimes. But when they don't, we assume we said the wrong prayer, didn't exert enough faith or harbored some secret sin in our hearts. But that is a silly and immature way to approach an omnipotent God.

Of course we should pray for miracles. But if God does not answer us the way we insist He should, we must rest in His all-knowing sovereignty and rejoice in the fact that Jesus has conquered death."

I think he wrote very well. I am always jealous of journalists' gift of writing. But what does the Bible say?

Jesus said, "Whatever you ask in My name, that will I do." And according to Exodus 15:26 and Deuteronomy Ch. 28, it is God's perfect will for you to be in health!

But in reality, unfortunately, there are more people who are unable to receive God's answers. At the last WCDN international conference held in Kenya, an excellent guest speaker Dr. Franz Cronje came from South Africa. He is a Senior Advisor of the organization 'Be in Health' based in Georgia, US. A sincere Christian Dr. Cronje said that only 10% of prayers translate into healing.

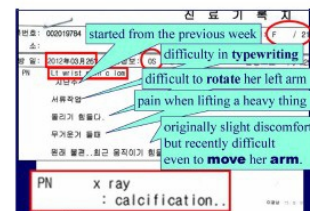

Some people complain about the lack of God's answers despite much prayer. So if you do not complain but rather give thanks to God and even rejoice, though you do not receive healing and rather are dying, you have very good, faithful and respectable attitude.

But I am curious about God's sovereignty. I know our Father God is not a dictator, tyrant or a capricious human-like god as found in the ancient myths - Greek, Roman, or Babylonian. Dr. Cronje said that the problem is not of God. We do need to rethink God's principles and apply them differently if we are to see different results. So I'd like to discuss our sovereign God's principles about divine healing.

I'll start with a practical example, a real case of a Korean patient. Female, age 21. 2012, last year, March 26. It was Monday morning. The attending doctor was an Orthopedic Surgeon. Left wrist pain with limitation of motion. The pain started from the previous week. It caused difficulty in her typewriting. Difficult to rotate her left arm. Pain when lifting a heavy thing. Originally there had been slight discomfort. But recently severe pain started causing her difficulty even in moving her left arm.

X-ray showed calcification at her left wrist. You can find about 4 calcified stones tearing the surrounding tissues, causing excruciating pain. The doctor recommended MRI to check more accurately. Maybe he was considering to operate because of the severe pain. So she made a reservation for taking MRI at the next day morning. As a Christian, she naturally prayed to God to get divine healing, and repented. But unfortunately her pain did not decrease. That Monday evening at home, her shoulder drooping, she looked quite miserable, not being able to do anything except for just suffering. The patient is my daughter. If your daughter is in that situation, what would you do?

WCDN is not against medical or surgical treatment. I will show you

a representative example, the case presented at the conference in Australia.

This child patient got multiple skull fractures, Intracranial Hemorrhage and pelvic ring fracture. He had been terribly hit by a fast-running car. He received all the possible surgical and medical treatments. And this patient is a son of Dr. Yeo, who's the general secretary of WCDN. Even after so much intensive care, the condition deteriorated. So the attending doctor told Dr. Yeo, the patient's father, that the child had little chance to survive. Dr. Yeo asked him to do their best with all the possible medical & surgical treatments. Also he prayed and asked Rev. Dr. Jaerock Lee to pray for his son. The result is this. He survived, recovered rapidly and became healthy again. And the cranioplasty was done successfully as well.

But my daughter was a young lady now in her early twenties. The surgery scar may bother her throughout her life. Especially the location, the wrist, is quite well exposed site, not covered by hair. She knew a friend of hers always wanted a plastic surgery to remove the surgery scar at her wrist.

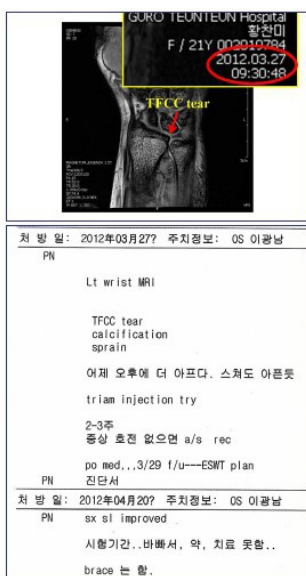

Then how about God's power and ability? God can resolve this problem even without any human assistance? You know that God is almighty. "Jesus Christ is the same yesterday and today and forever." (Heb. 13:8) And God does not lie. (Num. 23:19) So she already prayed but God did not answer to her prayer.

Maybe she had committed some sin. According to the Biblical justice, most of the spiritual roots of disease are sin, as Dr. Cronje indicated. Jesus also associated disease and sin. So she repented but could not receive answer from God. And I did not torment her insisting that she should repent more thoroughly. Actually, watching her suffering so much caused myself to suffer also.

Next day, March 27, it was Tuesday morning, MRI showed her Triangular Fibrocartilage Complex torn. The severity of pain in this kind of condition may sometimes amount to such a grade as caused by bone fracture.

So the doctor prescribed triamcinolone (corticosteroid) injection and peroral drugs. And maybe he was considering arthroscopic surgery also.

But my daughter did not like the idea of getting operated. Let me tell you how she behaved at the scene. She slipped out of the hospital without receiving the triamcinolone injection. And she didn't buy the prescribed medicine at the pharmacy. She was still unchangeably determined to depend only on God.

Then you may ask why she went to the doctor again. It was because she wanted accurate information, exact data of her condition. First reason. To ask healing to God more concretely. Second reason. To give glory to God after she would get divine healing.

I remember a case presented at the conference in Norway. It was the case of a Belgian diagnosed with non-Hodgkin's lymphoma, high grade malignant, in 1988 July.

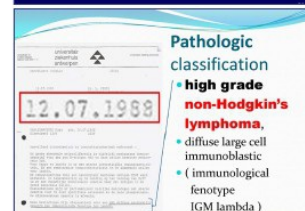

The doctors could not guarantee him to live another few months. But his wife was a person of strong faith. Though she was a nurse, she was sure that God wanted to heal her husband. Chemotherapy started on July 14 1988, just to slow down, not cure, the cancer. But surprisingly, 2 days after, on July 16, his birthday, the pain left. And all the visible tumors were gone. The patient Hugo continued chemotherapy, but could not find peace with it. So he stopped chemotherapy in November. The doctors were not pleased and said, "You will be back in a few weeks and we won't be able to help you anymore then." But his wife did not waver in her faith. She took his photo to keep, preserve the evidence of his disease. It would be useful to give glory to God after her husband would get divine healing, for sure. Actually this is not a good appearance, compared with his previous picture, just showing his disease and the result of chemotherapy.

After 20 years, Hugo still lives and is in very good health. He has become a pastor giving testimony about the miracle that he himself experienced.

For the similar purpose as Hugo's wife had, my daughter also took X-ray, MRI and secured the doctor's diagnostic note. And she did not have any anxiety. She only wanted to be prayed over by the person of great faith as soon as possible. "Is anyone among you sick? Let him call for the elders of the Church and let them pray over him, ... And the prayer of faith will save the sick, ... The prayer of a righteous man is powerful and effective." (James 5:14-16)

My daughter attended the prayer meeting for the sick at church that Tuesday morning. She listened to the preaching with much attention, with humble and sincere heart. And the sermon inspired by the HS and full of the spiritual love and compassion penetrated her heart so much that she repented from the bottom of her heart with overflowing tears. And she got prayed over by the preacher.

What would you think happened? A miracle? Sadly, there occurred nothing but just a slight improvement. Now she could lift up her left

arm though very cautiously. That's it. No dramatic miracle happened even after such repentance and prayer. And nobody told me that she attended the prayer meeting.

Now what would you think she would do? You think she gave up now? Next day, it was Wednesday. At lunch time, at the church restaurant, my second daughter ran to me. The patient was my first daughter. Now my second daughter. I didn't know why she was at church at that time of the day. She ran to me and shouted, "Daddy, daddy, she got healed!" At the back of her, my first daughter was coming with huge smile. It took some time for me to understand what happened that morning. Actually all the female members of my family attended the prayer meeting and they prayed fervently for my poor sick daughter. My daughter still had not given up her faith. And again she was touched by the preaching, and repented from the bottom of her heart even more than the day before. That accumulation of the thorough repentance and fervent prayer finally removed the barrier to her divine healing. She got prayed over by the preacher. Abruptly the severe pain was gone. She rotated her left arm and wrist violently. But she could not feel any pain. She got surprised and became so happy. She came to the front and gave a thrilling testimony. And all the attendees gave glory to God. Finally her father me also became really happy, and praised the Lord.

And I got very thankful to the preacher who prayed over my poor daughter. The preacher Lee is the wife of Dr Jaerock Lee. Mrs Lee is a spiritual warrior of prayer, usually prays several hours each day for the souls, patients and the kingdom of God with lots of healing for dozens of years.

You can compare the X-ray films taken before and after the prayer for healing. Calcification and no calcification. She could use her left hand freely, waving violently and even doing paragliding. Very healthy!

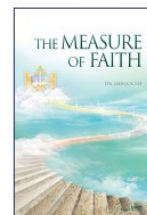

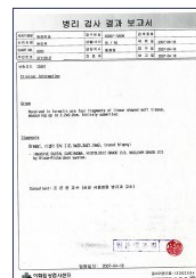

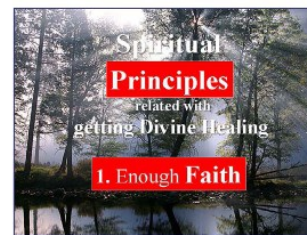

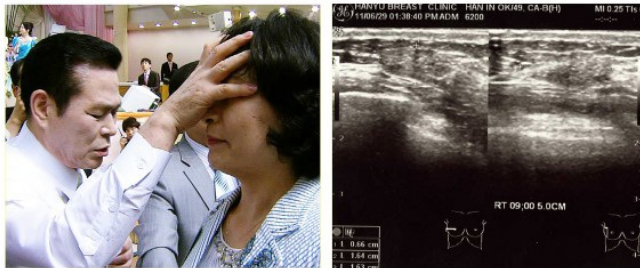

Now let's consider some spiritual principles related with getting divine healing.

First, we can consider faith. If my daughter had not had enough faith to continue to depend on God, she would have given up before getting answer from God.

At the conference in Kenya last year, a case of breast cancer was presented. Biopsy showed invasive ductal carcinoma in 2007. But the patient determined to depend only on God and wanted to be healed only by faith. Nobody persuaded her to determine like that. It was just her own decision according to her own faith. After being prayed over, her pain disappeared. But later severe pain reappeared, sometimes stabbing pain. Her right arm became weaker and weaker. She reflected on her Christian life, and studied the biblical teachings of Dr. Jaerock Lee, about spiritual growth and sanctification. Dr. Lee is very keen about that. Step by step imitating Jesus Christ more and more until we reach the new Jerusalem in heaven. She earnestly searched out her heart and realized that she was not diligent enough in the circumcision, transformation of her heart. She realized that it was just an illusion that she had good faith after long Christian life. She found arrogance, hate, complaining, displeasure, laying the blame on others, etc. Actually her husband had persecuted her severely. Curiously enough, whenever she repented, the severity of her pain decreased.

She got reexamined in 2009, two years after the diagnosis of the cancer. But sadly, her cancer mass was found rather slightly bigger than before. But she was not disappointed. Instead she gave thanks to God pouring tears with overflowing love for God. And she determined to transform more deeply and more rapidly. What a strong faith she had! She did not waver in her faith! Now she did her best to change even her personality to imitate the goodness and love of Jesus Christ more thoroughly.

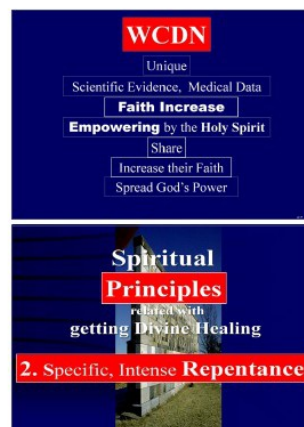

And in 2011, 4 years after the diagnosis, she was prayed over by Dr. Lee at a special meeting for divine healing. And the palpable mass in her breast disappeared. She got reexamined at the same hospital.

The doctor confirmed that her cancer was completely gone. I do not judge which is better to go to heaven earlier or to live here longer. But I'm sure that the divine healing brought her great happiness. And she could give glory to God by showing God's almighty power.

As for the case of my daughter, medical or surgical treatment might have improved her condition. But, then, she could not have experienced the dramatic personal intervention of God's power. Of course I also accept that you can experience God's miracle in addition to the effect of medical or surgical treatments as in the case of the son of Dr. Yeo. It depends. Anyway, such experience of God's miracle resulted in much increase in her faith. And she could realize Father God's touching love and compassion helping us resolve our difficulties. He's not indifferent to our problems.

By the way, how could she have such faith to depend on God? That's because she watched divine healing occurring at her church frequently. So you need to notice that such indirect experiences result in the increase of our faith. Then I hope you can recognize the significance of the activity of WCDN.

Doctors, health professionals and scientists from around the world present, watch and listen to the divine healing cases at the unique conferences of WCDN, with scientific evidence, medical data, which are very persuasive for scientists. Their faith grows up. And they get empowered by the Holy Spirit. When they return home, they share this experience with their family, friends, patients and other acquaintances, increasing those people's faith again. Spread and spread of God's power even to secular people through mass media by the professional credibility of doctors like the beloved physician St Luke. What a wonderful work of God the WCDN is doing! I give thanks to God for giving us this wonderful vision through Dr. Lee, the founder. And the Holy Spirit helped us accomplish this vision.

As the Second principle for getting divine healing, we may consider repentance.

My daughter also repented. But she could not find the exact cause easily. So it took some time for her to get answer from God. But Mrs. Lee's Spirit-guided, Spirit-sensitive and penetrating preaching finally touched her heart deeply. Now she could recognize and pinpoint the reason, the wall between God and herself.

Not just broad, general or mild repentance but the specific, intense repentance is effective to remove the barrier to divine healing. "The word of God is living and active. Sharper than any double-edged sword, it penetrates even to dividing soul and spirit, joints and marrow; it judges the thoughts and attitudes of the heart." (Heb. 4:12)

Our Father God is not only God of love but also God of justice. That was clearly expressed on the cross.

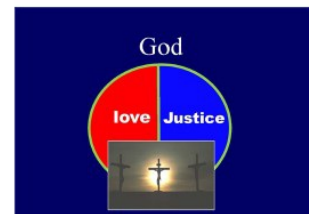

In the country, really governed by order and justice, even a son of the president of the country is punished if he violates the law of the country. However hard the president wants to pardon his son, he cannot do on his own because the president also should keep the law.

In the Bible, we can find a similar instance. King Darius of Persia could not disobey the decree which he himself had put in writing. So the king had to accept the slanderers' accusation against Daniel. He had to order Daniel to be thrown into the lions' den even though the king himself hated to do that. (Daniel 6:14-16)

Our sovereign God has established the laws of the spiritual realm. As a righteous Judge He guides everything in an orderly fashion. Therefore Jesus said, "If you abide in Me, and My words abide in you, ask whatever you wish, and it will be done for you" (John 15:7) If we, by faith and trust, obey God's health principles, then healing by our sovereign God becomes available to us. Satan cannot accuse God of unrighteousness or partiality, favoritism.

And until we receive the kind of faith by which we can get God's answers, we must pray on and accumulate the necessary sum of prayer.

But God answers those who believe they have already received His answers, at the time of His choosing. Even if two persons prayed to God with the same exact problem, the appropriate amount of prayer is different. And a great vessel will be tested greater and come forth as gold. I think Dr. Chauncey Crandall may be a wonderful example of that. I was really touched by his testimony at the conferences in Norway and in Italy as well. No one must judge others and say, "Look at all his hardships despite his faithfulness!"

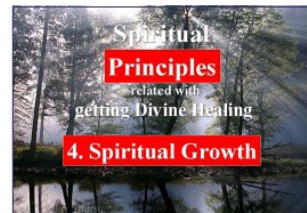

Now I think you may have a question, "For what sin did his daughter suffer such tormenting pain?" I said that my daughter attended the prayer meeting for the sick. The subject of the meeting then was "The First Love in the faith in God and Longing for the Spiritual Growth". In March in 2012, last year, my daughter, as a college student, was extremely busy with too frequent exams, homework, extracurricular activities and part time job. She could not have enough sleep day after day. But she did not cease praying and she did not commit particular sin. But her longing for her spiritual growth, sanctification became less earnest. At such situation, the pain started at her wrist and became more and more severe. While she was listening to the preaching of Mrs. Lee, she realized something very important. She realized how much Father God desires that she continue to preserve her earnest longing for spiritual growth even in such difficult situation. God strongly wants us to imitate Jesus Christ in our whole spirit, soul and body, and to share deeper and deeper spiritual understanding and love with Him no matter what situation we are in. That should be our first priority in our everyday life. Such understanding and vivid realization of God's love made her fall into shedding tears and fervent repentance from the bottom of her heart in Tuesday meeting and even deeper in Wednesday meeting. "Repent and do the things you did at first." (Rev. 2:4-5) "because you are lukewarm, I am about to spit you out of my mouth." (Rev. 3:16) You know why the Lord warned like this. It is His love to protect and rescue us from our spiritual slumber(sleep).

According to the Scriptures and the practical instances like my daughter's, we can understand the importance of our spiritual growth.

According to Romans 12:3, God gives us the measure of faith by his grace. 1John Ch. 2 refers to our spiritual maturity as children, young men and fathers. "Though the mustard seed is the smallest of all your seeds, yet when it grows, it is the largest of garden plants and becomes a tree" (Matt. 13:31-32) "if you have faith as small as a mustard seed, Nothing will be impossible for you." (Matt. 17:20) Nothing is impossible for us when our faith grows enough.

The spiritual love as in 1Cor. Ch. 13, the fruit of the Spirit as in Gal. Ch. 5, and the beatitudes in Matt. Ch. 5 may be three principle pillars of our spiritual growth. And all these get condensed to love, love for God and love for our neighbors.

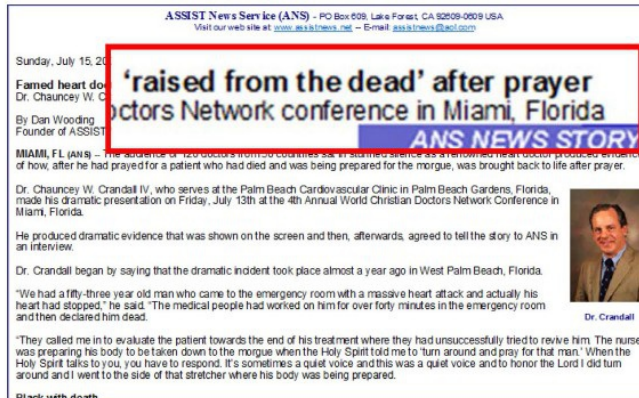

God measures each one and answers accordingly. But God sometimes heals people even though they aren't yet born again. Actually Dr. Jaerock Lee himself got divine healing when he had no faith in

God just by attending a prayer meeting for the sick unwillingly. Her Christian sister asked him to guide her to the place of a prayer meeting for the sick. Her hidden intention was to evangelize him. God might have already known that Dr. Lee would be a precious vessel. And his sister's prayer of love for so many years finally moved God.

At the WCDN international conference held in Miami, US, Dr. Chauncey Crandall, a renowned interventional cardiologist of Palm Beach, Florida, where the richest people of the states live, presented

a case of massive cardiac arrest.

The patient got raised from the dead after his prayer. Dr. Crandall said that he had watched miracles happening in the mission field of Mexico. And that experience helped him a lot to increase his faith. The case was broadcast nationally through Fox News.

The patient was not a Christian. But his ex-family had prayed for his salvation for 20 years. Finally he accepted Jesus Christ as his savior after he was raised from the dead. As 1 Peter 4:8 says, "love covers over a multitude of sins."

Dr. Crandall provides both physical and spiritual care for his patients

very successfully, and is appreciated by them.

And God is moved and delighted to answer a novice(beginner) when he displays even small faith. God answers him right away and leads him to meet and experience God.

But if you grow more spiritually, you will see God's answers as much as you accomplish your sanctification. From Romans all through Jude, the Scriptures teach us about sanctification. God cannot heal unless we measure up to His standard of holiness.(A More Excellent Way to Be in Health p.59) The standard of holiness which Sovereign God expects from you may be quite higher than you presume. Then the spiritual laws or principles may seem too strict. But the perfect love can be manifested only through perfect justice. The standard is not absurdly high. It is exactly based on the justice according to the laws of the spiritual realm.

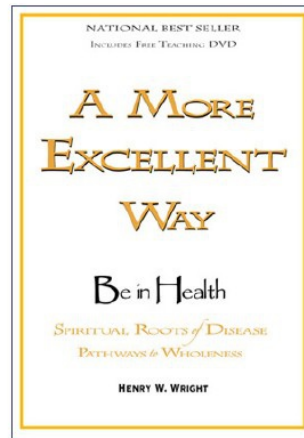

So "let us cleanse ourselves from all filthiness of the flesh and spirit, perfecting holiness in the fear of God."(2Cor. 7:1) Fellowship with God involves being obedient to Him, not out of "Phariseeism" or legalism, but out of a heart that wants to know, love and please God by faith.(A More Excellent Way to Be in Health p.60) "Rejoice always; pray continually; give thanks in all circumstances, for this is God's will for you in Christ Jesus."(1Thessal. 5:16-18) It is very difficult to throw away your sins on your own, but it is very easy if you receive the God's power and grace, and the HS's help. Only by fervent prayer, can our heart turn into good soil.

But even though one repents earnestly, loves God, is faithful, does his best to be a good Christian, prays fervently and is prayed over also, sometimes one does not get divine healing, finally to die or be weak for years. This is not because of lack of love or faith, but because of the delay of the answer from God caused by some special reasons according to God's justice and love. One may be spiritually linked with the sins of other people.

The spiritual laws or principles originating from God's justice are so complicated that we human beings cannot fathom all of them.(Prov. 16:1) But you don't need to become discouraged. Because God says, "Can a mother forget the baby at her breast and have no compassion on the child she has borne? Though she may forget, I will not forget you!"(Isaiah 49:15)

We discussed on "the Principles that We Need to Know to Get Divine Healing."

- 1) Faith
- 2) Repentance
- 3) Prayer
- 4) Spiritual Growth

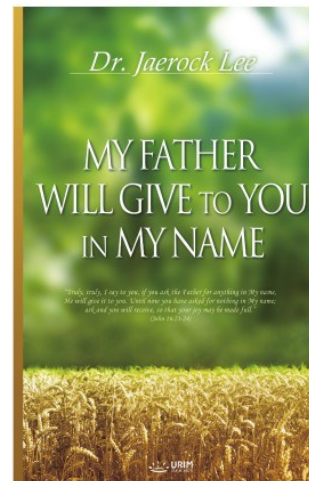

5) Spiritual Link

There may be many other principles also.

Conclusion

I pray that today's discussion might be some practical information helpful to get divine healing. It's mainly based on the biblical teachings of Dr. Jaerock Lee. He came to love Jesus Christ so much after he himself experienced the unforgettable divine healing by which he was rescued from such a tormenting suffering for 7 years. Therefore he did his best to practice the teachings of the Lord in his everyday life praying so earnestly and fervently, frequently fasting. His teachings are based on his real experiences showing God's power and compassion for the patients. I am sure that those will encourage you a lot to have greater faith. I respect his dedication for the salvation of souls as many as possible and for their transformation as well. He humbly and strongly supports WCDN for the glory and kingdom of our Heavenly Father God.

Divine healing in doctor's practice thoughts on WCDN conference in Mexico

Dr. Ostreiko Oleg Vikentievich (Russia)

- Neurosurgeon, Associate Professor
St. Petersburg, Vladivostok State Medical Institute

What is the evidence of God's participation in healing is not a simple question. In the biblical stories, Jesus healed immediately. I know for sure from my own neurosurgical practice that patients that you (as a surgeon) and someone else are praying for always undergoing the operation at the best scenario.

In my practice the patients with difficult and serious health condition, especially with tumors complicated for surgery, usually undergoing the period of post surgical deterioration of their condition. At this period of time the patient is hanging between life and death. His doctor and resuscitator already are struggling for his life. In these cases it is very important to begin calling upon the Lord as soon as possible to heal this patient, and to fervently and unceasingly pray for him.

I noticed, when a patient in a critical condition is placed into the intensive care unit, his doctor may not know yet for sure what exactly is going on

in brain of the patient after surgery: whether hematoma was formed or blood circulation in important life-supporting structures of the brain has failed. I realized that it is very important not to accept in the mind that the catastrophe has happened, for it may lead the patient to death. It is very important to put the situation in God's hand right away. I also noticed that even the most dangerous conditions could be healed in UNIMAGINABLY miraculous ways, even without a trace of disease left. In these cases, all of a sudden, doctor's serious concerns are destroyed because they seemed to be greatly exaggerated. In the morning when doctor comes to intensive care unit and sees that his patient is recovering, at first takes a sigh of relief and then gives God great glory. It is like something that is not real, inexplicable, but very tender-hearted.

In my understanding, doctor steps out to fight against patient's disease. The process of healing looks exactly like a battle. You will win the battle if you would fight together with God. This is

how the Glory and the Signs of God present in physician's career. All methods used by doctors would be effective, safe and would result in healing. It is important to keep focus on true Healer, on Him, Who told the doctor what kind of medication is better to prescribe and what approach to use. Who managed the process of operation. This is where you can see His work and His presence! And last. I noticed that patients who prayed for their healing, and for whom I prayed for and maybe other people prayed as well, these patients are not included in the group of «standard results of the treatment». These patients always show results better than just the «standard» group. And this could be remarkably prominent.

For example, the patient T. (Russia, Arkhangelsk) experienced growing glioblastoma of the right frontal lobe (the most malignant brain tumor): average duration of survival in this group 2-8-10 months, but she is living for 5 years already; being in a good shape she is

receiving maintenance treatment and there are no signs of tumor activity. The second example (Russia, St. Petersburg). Patient G. with multiple primary malignant brain tumors. The average life expectancy of such patients are 4-8 months. He struggled at first, but then he gave up, but I prayed for him. He lived for 3 years, and was significantly ahead of the «standard group» in life expectancy.

In conclusion, as I see, the perfect treatment should contain the following: the patient must understand the power of God's healing. The patient must give up existing sinful factors. The patient himself and preferably his relatives, especially his parents and acquaintances must constantly pray for his recovery. At all stages of treatment and after patient is discharged from the hospital, his doctor has to pray for patient's healing. It is important for doctor to realize that if God gives the patient to the doctor, He gives opportunities for him to help the patient and to reach a positive outcome of the disease.

Difference between Jesus and Jesus Christ

"And there is salvation in no one else;
for there is no other name under heaven that has been
given among men by which we must be saved." (Acts 4:12)

Those who have faith can experience God's works of answers and blessings.

But some people pray just habitually 'in the name of Jesus'

or 'in the name of Jesus Christ.' 'Jesus' means 'the One who will save

His people from their sins.' It is a future form. On the other hand,

'Christ' is a Greek word that is translated as 'Messiah' in Hebrew.

It means 'a Savior who has completed God's providence of salvation.'

It is what is known as the non-continuous present perfect
form for an action done in the past.

Therefore, it is right to call the Lord 'Jesus' before He was crucified.

After Jesus was resurrected we should call Him 'Jesus Christ',

the Lord Jesus, or the Lord.

We should pray in the name of the Lord Jesus Christ,

which is spiritually correct.

- Extract from *Lamp*, Rev. Jaerock Lee's 1-minute sermons

The Scientific Experiment Proved the Outstanding Safety of the Noah's Ark

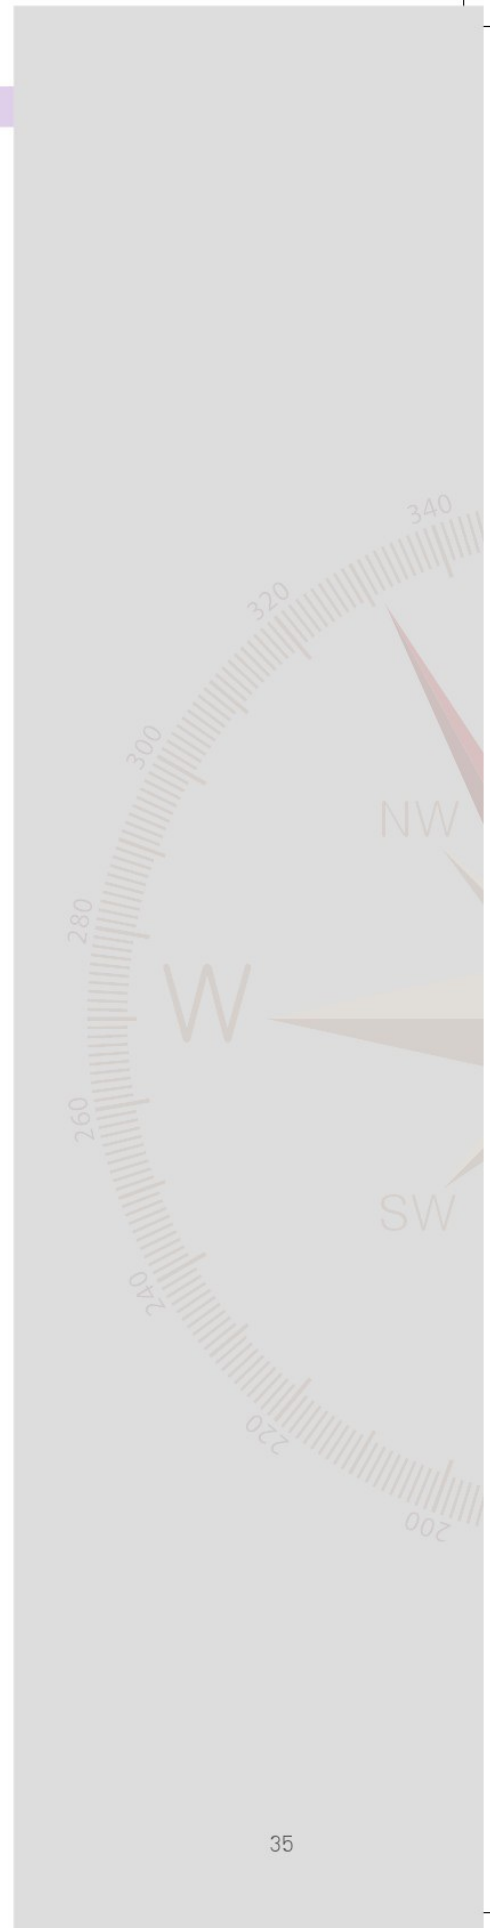

Noah made the Ark in accordance with God's command 4,500 years ago. God taught him how to make it in detail and Noah obeyed Him. After Noah's family and every living thing entered the Ark, it started to rain. They lived in the Ark for 382 days. It had to be able to withstand the flood that came upon the earth for 40 days. Let's reflect upon the love of God in the Noah's Ark by looking into its size and safety.

God taught Noah the way of constructing the Ark and the size specifically as recorded in Genesis 6:14-16. "Make for yourself an ark of gopher wood; you shall make the ark with rooms, and shall cover it inside and out with pitch. This is how you shall make it: the length of the ark three hundred cubits, its breadth fifty cubits, and its height thirty cubits. You shall make a window for the ark, and finish it to a cubit from the top; and set the door of the ark in the side of it; you shall make it with lower, second, and third decks."

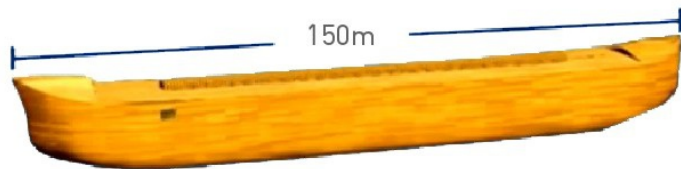

A cubit is the unit of length, the length from the elbow to the end of the fingers of an average adult. There have been various cubits depending on generations and people who used the unit. However, one cubit is approximately between 46cm and 56cm in length when changing into the metric system we are using today. If a cubit is 46cm, the length of the Ark is 138m, its breadth 23m, and its height 14m. If a cubit is 53cm, the length of the Ark is 160m, its width 27m, and its height 16m. The length is as long as one and one-half soccer fields and its width 20 times wider than a basketball court.

Usually, a floor is about 2.5 to 3 meters, and thus the ark of Noah was 5 to 6 stories tall.

By the way, Noah's ark had 3 floors. This ark of Noah's was big enough to load all the animals that God

Length of the Noah's Ark

If 1 cubit = 50cm

designated along with the food for them all. It has been calculated to be factually true by scientists.

Noah's Ark has been shown to be very safe in terms of the ratios throughout its design and its structure. It was designed to regain balance quickly in heavy seas. The U.S. government has designed and manufactured a warship according to the design Noah's Ark had adopted. Around 1890, a battleship was constructed in the States, and it was built by the same design ratios with that of Noah's ark. It was the U.S.S Oregon, which is considered as one of the toughest battleships constructed so far.

An interesting experiment related to Noah's ark was performed in June, 1992 in Korea.⁶ The Korea Research Institute of Ships and Engineering, a national institution, conducted marine engineering research and experiments on Noah's ark at the request by Korea Association for Creation Research (KACR). Its name has been changed to 'Maritime & Ocean Engineering Research Institute of KIOST (Korea Institute of Ocean Science & Technology).' This institute is world renowned for its vessel test and evaluation.

Height of the Noah's Ark

Width of the Noah's Ark

U.S.S Oregon

Most of export sea vessels constructed in Korea are evaluated in this institute.

They made a model of Noah's ark with a scale of 1:50 for various tests.

They floated the model in a big pool which could generate artificial waves, and tested various stability features of the ark.

In general, the safety of a ship in a seaway is related to three major safety parameters — structural safety, overturning stability, and seakeeping quality. Good structural safety ensures the hull against damage caused mainly by wave loads. Enough overturning stability is required to prevent the ship from capsizing due to the heeling moment caused by winds and waves. Good seakeeping quality is essential for the effectiveness and safety of the personnel and cargo on board.

In these experimental works, the concept of 'relative safety', which is defined as the relative superiority in safety compared to other hull forms, was introduced and 12 different hull forms with the same displacement were generated for this purpose. Evaluation of these three safety parameters was performed using analytical

tools.¹

The concept of relative safety of a ship has been introduced by several researchers, such as Comstock and Keane,² Hosoka et al.,³ Bales⁴ and Hong et al.,⁵ to analyze the seakeeping quality. Researchers extended the relative safety concept for the seakeeping quality to the concept of total safety, including structural and overturning safety.¹

From this experiment, total safety index showed that the Ark had a superior level of safety in high winds and waves compared with the other hull forms studied.

Therefore it has been scientifically proven that Noah's ark had amazing stability that could compete with modern sea large vessels that are built in accordance with highly developed technology.

Wonderful Mysteries of the Human

Body

A psalmist confessed in Psalm 139:14, "I will give thanks to You, for I am fearfully and wonderfully made; Wonderful are Your works, and my soul knows it very well." When it is surveyed here just how wonderfully and mysteriously God made a human body, it is expected that you should be able to give your heartfelt thanks to God the Creator and lead a blessed life in the faith in Him.

It is said that a car consists of about 13,000 parts, and that about 3,000,000 parts are necessary to assemble a Boeing 747. They say that about 5 million parts are required to build a space shuttle. How many parts do you think constitute a human body? At the creation of a human being, God had all information about such a creature, and designed every part of it. How wonderful and mysterious is a human body God created according to His design?

- A Human Has Sixty Trillion Cells and 206 Bones
- Bones that Are Renewed Every 7 Years and Skin

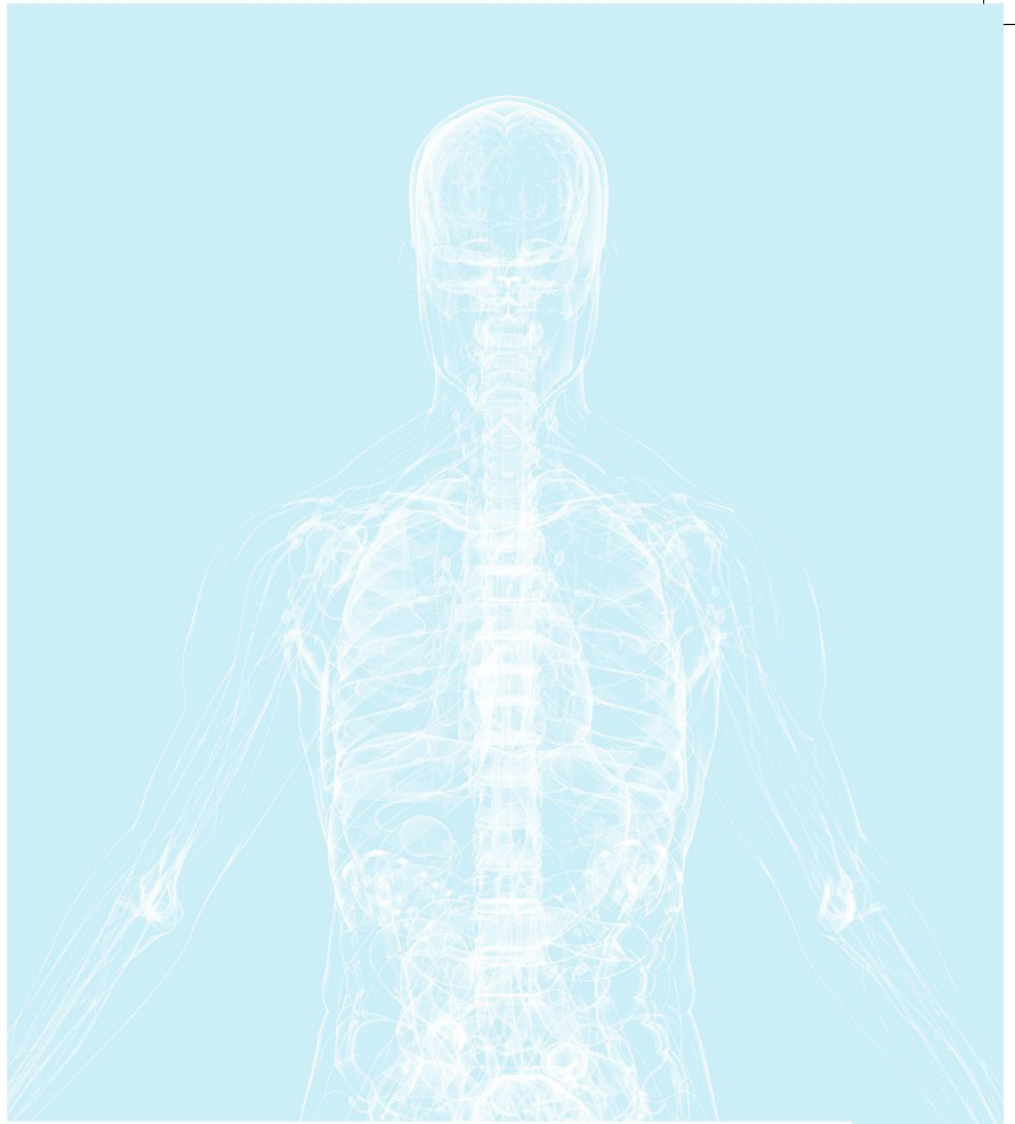

A man's body consists of more than 60 trillion cells. An adult has 206 bones. The human bone is stronger than granite. A bone the size of a small match box is capable of supporting 10 tons, and is stronger than concrete. The bone structure constantly changes so that the entire skeletal system of the human body renews every 7 years. The surface area of the skin for the average male is 1.9 square meters, and it is 1.6 square meters for a female. The skin constantly peels off and renews; it is completely renewed every 4 weeks. It is as though we put on a new natural water resistant suit of skin every month. The entire skin we peel off during our whole life weighs 48kg and we put on new skin 1,000 times in our lifetime.

- The Total Length of the Blood Vessels Could Circle the Earth 3 Times
- Blood Travels around the Whole Body in 46 Seconds

The total length of the circulatory system of the blood vessels is about 120,000 kilometers.

This length could circle around the earth 3 times. Now, 4.7 liters of blood passes through our heart every minute. If we think about the size of a 2-liter water bottle we can realize how quickly the heart is pumping the blood.

The blood that is pumped from the heart travels throughout our body and returns to the heart in approximately 46 seconds. And the amount of the blood of a man is proportional to his body weight. There are about 80 milliliters per 1 kilogram of body weight; if a man weighs 60 kilograms, he may have 4.8 liters of blood. The main constituent of blood is the erythrocyte (red blood cell) that is produced in bone marrow at the rate of 20,000 per second.

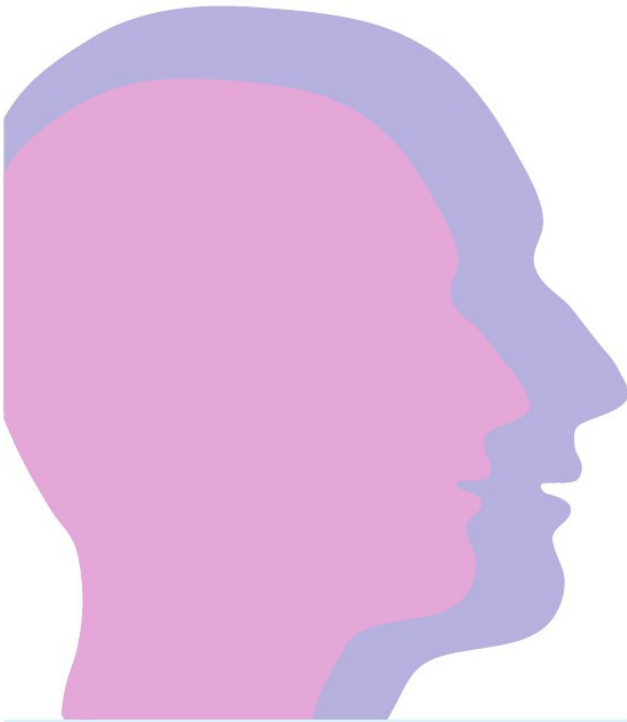

- The Whole Area of All the Alveoli is One-fourth the Size of a Basketball Court
- The Whole Passage Way of the Digestive Tract from Beginning to End Is 8.5 Meters Long

Each lung has about 3~500 million alveoli, which, if stretched out, would be able to cover between 70 and 100 square meters. This is an area that is about one-fourth the size of a basketball court. Such huge things are folded so intricately inside our body. Let's take a look the digestive tract. Beginning in the mouth it is about 8.5 meters from one end to the other. The large intestine is 1.5 meters long. The small intestine is 6 meters long which is the longest part of the digestive tract. A human can survive even if he loses half of his stomach, or with just one kidney or one lung.

- The Gastric Acid from the Stomach Can Dissolve Zinc
- Epithelial Layer Called the 'Mucous Membrane' Prevent Damage

The gastric acid which is secreted by our stomach has such a high level of acidity that it can dissolve zinc. If our stomach secreted only this gastric acid, the stomach walls will be severely damaged. However, our stomach has an epithelial layer called the 'mucous membrane' which produces mucus to prevent damage. In addition, an alkaline secretion is produced that neutralizes the gastric acid and prevents the walls from being dissolved. At the same time, the cells of the stomach walls are continually replaced with new cells. The cells of the wall are renewed every 3 days.

- The Blink of the Eyes Happens 900 Times an Hour
- Two Nostrils Take Turns Every 3 or 4 Hours

How fast is a “blink the eye”? It takes 1/40 of a second. On an average, a man blinks his eyes 15 times a minute, or about 900 times an hour. The blinking of the eye protects the eye, and soothes and lubricates the cornea. Every 3 or 4 hours, the two nostrils take turns doing their job. As the nostrils breathe in air, one nostril detects odors while the other just passes the air. On the tongue of a man, there are about 9,000 taste buds which can detect tastes.

Inside an ear, there is an eardrum which can receive the vibrations of sound waves. In the eardrum it smells very bad. This is to prevent any tiny insects or worms from hurting the interior of the ear if it enters into the ear.

God Guards His People as the Pupil of His Eye God's True Children Guard His Teaching as the Apple of Their Eye

Deuteronomy 32:10 says that God “guards His people as the pupil of His eye.” David prayed in Psalm 17:8 that God may ‘keep him as the apple of the eye.’ God protects the children of faith just as the eyelid protects the pupil by quickly coming down when dust enters into the eye. Even in a very urgent and dangerous situation like a fatal car accident, for example, God works very quickly through angels.

Those who have experienced it already know how quickly God works and protects them. It tells us to keep the commandments of God as though it was the apple of our eye.

Now, Proverbs 7:2 says, “Keep my commandments and you will live, and guard my teaching as the apple of your eye.” When something we think may be unrighteous approaches, we should quickly turn back. When the deceiving things of the world come near us like particles of dust, we should quickly bring down the eyelids of our heart so that they cannot get into our heart. By doing this, we should always live in the Word of God so that the things of the world cannot sneak into us for a minute, a second, or not even 1/40 of a second.

World Christian Doctors Network

The 11th International Christian Medical Conference **Bulgaria 2014**

**Medicine, Science
& Spirituality**

Date 9th~10th May 2014

Place Sheraton Sofia Hotel Balkan,
Sofia, Bulgaria

WCDN Bulgaria

The 11th International Christian Medical Conference

Dr. Kiril Svilenov

- Chairman of Organizing Committee
WCDN Conference Bulgaria 2014
- General Practitioner

Dear Colleagues and co-workers,

As a chairman and on behalf of the organizing committee I want to invite you to join in the next WCDN conference in 2014, which will take place in Sofia, Bulgaria (May 9-11). Together we will witness and share cases of a divine healing from our medical practice, proven by a medical data. We will be inspired by guest speakers in motivating us to be an example of Christ-like behavior and be a light at the workplaces where we serve.

In addition you will be able to enjoy the Bulgarian spirit, Bulgarian dish and beautiful nature in May.

Let us join together in spreading the God's Kingdom in our part of the World. We will be blessed by the fellowship and giving glory to God for He is the Healer - still the same yesterday, today and forever.

Your participation and presence will make the WCDN conference 2014 look special and different.

Welcome to Sofia, Bulgaria

With love and blessing in the Name of our Lord Jesus Christ

God will Manifest in the Balkans

Dr. Lyubka Tancheva

- Director, WCDN Bulgaria
- Associate Professor, Ph. D. Psychopharmacology

Dear brothers and sisters from medical and scientific areas,
Greetings from Bulgaria in precious name of our Lord Jesus Christ!
I believe all of you, like us, are excited from the wonderful time spent together on the 10th WCDN Conference in Toluca, Mexico this year. Now, it is great honor for us- the representatives of WCDN in Bulgaria, to prepare the next 11th Conference in our country under the motto: Medicine, Science and Spirituality. WCDN- Bulgaria was established in 2011. In 2012 we had our first National Conference. In 2013 Sofia was the host of the Balkan WCDN Conference with delegates from several countries. The vision of the 11th WCDN Conference 2014 is focused on our preparation in medical and scientific areas for the soon coming of our Lord Jesus Christ.

Our expectations from the Conference are: 1. To understand better the special time we are living and working- time of great scientific breakthroughs, but of less compassion for suffering people, time of more darkness and inhumanity. 2. To realize clearer our responsibility (professional and spiritual) as His witnesses before the society, our patients and colleagues. 3. To encourage each other to be partners of the Lord in our work and care for people.

Dear colleagues and friends,

On behalf of the Organizing Committee in Bulgaria, I welcome all of you and hope to enjoy together of wonderful medical cases of healings (the real manifestation of God's power), to deep anointed plenary reports and inspired praise and worship of our King Jesus, the Messiah. We expect God's people from Balkan countries also to join us.

Bulgaria is one of the most ancient countries in Europe, situated in the heart of the Balkans - not big, but blessed nation who gave to the other Slavic nations (in 9th century) Cyrillic alphabet and translated Bible. In our new history Bulgarian nation saved all Jewish people from the Holocaust during the II WW. The capital Sofia city was favorite residence of several Roman imperators and now is modern town with warm natural springs, antique history and green nature.

We want to make your stay in Sofia comfortable, refreshing and satisfied. We are planning some optional short trips after the Conference to the early places where apostle Paul proclaimed the Gospel for the first time in Europe and/or to see historical Seven Churches (in the Book of Revelation).

With great joy and blessings I welcome all of you on 11th WCDN Conference in Sofia, Bulgaria!

WCDN Korea

Dr. Joonsung Kim

- Director, WCDN Korea
- Department of Pediatrics, Ulsan University Hospital
University of Ulsan College of Medicine, Korea
- MD. Pediatrician

Director of WCDN Korea, Dr. Joon Sung Kim won the 'Young Researcher Investigator Award' in WCPGHAN, the 4th World Congress of Pediatric Gastroenterology, Hepatology and Nutrition(WCPGHAN), held in TICC, Taipei, Taiwan, Ulsan University Hospital said.

Childhood obesity is a growing concern worldwide, and in this congress Dr. Joon Sung Kim drew attention with his research on the cause of abdominal visceral obesity and nonalcoholic fatty liver disease among obese children and adolescents.

Professor Dr. Kim, in his research conducted on Hispanic and African American children and adolescents during his studies in 2010, proved that significant elevated serum concentration of inflammatory adipocytokines which are secreted from visceral adipose tissue along with increased proportion of visceral adipose tissue and fatty liver disease in those study subjects.

Adipocytokines are biologically active substances secreted from adipose tissue, and they cause variable dysfunction of disorders when there are abnormal fatty accumulation in the multiorgan or systems.

"This research will help with prevention and treatment of children and adolescents with obesity and nonalcoholic fatty liver disease and give a spur in the research on suppressing adipocytokines and treating obesity," said Dr. Kim.

Dr. Joon Sung Kim studied in the Childhood Obesity Research Center of University of Southern California for one year since March 2010. He also finished the- Master-class Course on Pediatric Gastroenterology, Hepatology and Nutrition in University of Cambridge in September 2011. He is now an academic committee member and a paper examiner of the Korean Society of Pediatric Gastroenterology, Hepatology and Nutrition.

WCDN Headquarters' staffs and members of WCDN-Korea have delivered various medical services visiting welfare facilities for senior citizens and for old age and inpatients who are suffering from various diseases and they hold this kind of event annually on National holidays in Korea.

WCDN Kenya

Dr. Zipporah Ngumi

- Director, WCDN Kenya
- Chairperson of Organizing Committee
WCDN Conference Kenya 2012
- Board Member of Kenyatta National Hospital in Kenya

“WCDN Kenya is planning to hold WCDN Africa Regional Medical Conference on April in 2014.”

WCDN Kenya conference committee had planned to hold the WCDN Africa Regional Medical Conference on April , 2014 since Kenya conference held on May 2012.

And committee is going to prepare the conference in earnest through the meeting to be held on the end of Nov.

Dr. Norbert Rakiro

- Administrator of Organizing Committee
WCDN Conference Kenya 2012
- Public Health Specialist & Physician Holding MB.ChB

Dr. Norbert Rakiro, an administrator of WCDN Conference Kenya 2012, became a General Secretary of Kenya Christian Doctors Association.

We expect Kenya Christian Doctors Association to be more prosperous and developed for the glory of God in the future.

WCDN India

To prepare the Puducherry Medical Seminar to be held in Dec, 2013, the promotion for the seminar is being progressed with prayer meeting of each medical university as the center.

WCDN Mexico

“WCDN Venezuela will be opened on Nov 9 and there will be a 1 Day medical symposium as well.”

Dr. Daniel Fuentes Acosta (Director of WCDN Mexico) and his wife has visited VENEZUELA on Nov 9 to open WCDN VENEZUELA and encourage the delegates of the medical symposium as well. About 400 medical doctors attended the symposium from 3 cities and 15 different churches and also they have shared the vision of WCDN given by God and 4 healing cases were presented and gave a great glory to God. We expect greatly Christian doctors from VENEZUELA to take an active part in the future.

Dr. Daniel Fuentes Acosta

- Director. WCDN Mexico
- Chairman of Organizing Committee WCDN Conference Mexico 2013

Dr. Elizabeth Halley

- Organizing Committee WCDN Conference Mexico 2013
- Principal of Vinculation of Social Security 21st Century
- National Commission of Social Protection in Health
- Pediatric Cardiologist

She has visited Korea to attend the 4th International Congress on Abdominal Obesity [ICAO2013] and presented "Waist Height ratio as predictor for cardiometabolic risk in Mexican children and adolescents."

She has visited Manmin Central Church where Dr. Jaerock Lee (Founder of WCDN) is pastoring, Seoul, Korea and experienced the true Christian life through attending worship service and prayer meeting as well.

WCDN Scandinavia

Dr. Anna Lena Lobkka

- Organizing Committee WCDN Conference Norway 2008
- Dentist

Dr. Anna Lena Lobkka, an Organizing Committee member of WCDN Conference Norway 2008, has been doing her medical mission hard for the glory delivering the love of the Lord. She was with her friend on the photo with whom she was doing a medical mission.

Dr. Sven Frederick

- Organizing Committee WCDN Conference Norway 2008
- Founder of "Doctors Against Abortion"
- General Practitioner

Dr. Sven Frederick, an Organizing Committee member of WCDN Conference Norway 2008, opened a private clinic on Dec 1, 2013. We expect him, (who is) a Founder of "Doctors Against Abortion", has been speaking about "Abortion" on national TV, to deliver the love of God to many people thinking the life is so valuable that God has given.

Members Visit Korea
